

## How to compile and execute your program?

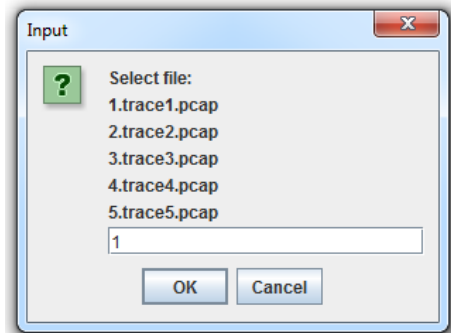

- In my case I used “ jnetpcap-1.4.r1425-1.win64 ” version
- The policies are coded as class inside the file IDS file
- all trace Pcap files should be in the same folder

## How to run:

- 1- Press Run  window will appear
- 2- Enter policy Number you want to test and press **OK** or press **cancel** to exist

- 3- Enter Trace file Number you want to test and press **OK** or press **cancel** to exist

- 4- If there is a results an alert will appear otherwise you will go to step 2
